ABOUT:

Weeping! Wailing! Gnashing of teeth! So went the never-ending toothbrush-time battle between a father and his two young sons. Eventually the father bellowed, "Enough! There must be a better way!" And he threw down his laser whip and picked up his sketchbook. And so their energy was transferred into the forging of a powerful tool: a toothbrush timer to put an end to their silly struggles. They brought characters to life, they made up silly music, and they wrote code to bind it all together and put it onto a glowing touch-screen. And behold, they saw that their creation put an end to their strife. And they were happy and they called it "BRUSHEEZ" and they put it on the App Store in hopes that other children throughout the land would also have fun brushing their teeth.
